

FOR IMMEDIATE RELEASE

**Hollander Establishes Partnership with Industry Leader CBCDashboard Management**

*Hollander to provide CBCDashboard alongside Powerlink® Ad Hoc Reporting to give customers the analytical edge in the marketplace*

MINNEAPOLIS – September 17, 2015 - Hollander, LLC., a business unit of Solera Holdings, Inc. (NYSE: SLH) and the leading provider of software and data solutions for the automotive recycling industry, has completed a reseller agreement with CBCDashboard Management, LLC to provide the most sophisticated business analytical tools available in the recycling marketplace.

CBCDashboard, developed by Robert and Chad Counts of Counts Business Consulting, LLC, combines automated and manual entry data collection with algorithms that analyze the performance of an auto recycler's business. This empowers auto recyclers with data to monitor the company health and to plan and manage the growth of the business.

Hollander is pleased to pair CBCDashboard with its own reporting tool, Powerlink Ad Hoc Reporting, to give auto recyclers an enhanced view of their business operations, allowing them to streamline every facet of their operations – from buying inventory to managing day-to-day operations to part sales and more. With integration to Hollander's yard management system Powerlink, CBCDashboard adds the industry's most comprehensive analytics tool to the most complete solutions package offered in the recycling industry.

"We are very excited for our partnership with Robert and Chad," Anders Moeller, managing director of Hollander said. "The collaboration of our two solutions will be tremendous for our customers – showing them data they've wanted but didn't have access to, and also data that will help them grow in ways they never knew existed, there's no tool set available in the industry like what we now offer."

Hollander customers have already begun to peek into the potential of CBCDashboard. Chad Counts demonstrated the product at the recent Hollander Regional Training Summit, which was held in the Detroit area August 29<sup>th</sup> and hosted nearly 70 recyclers. Counts presented the product and took questions in a classroom setting, and continued sharing the solution in Hollander's Technology Test Drive Center.

"Partnering with an industry leader gives us a unique opportunity to educate recyclers about our solution," Chad Counts said. "The Regional Training Summit allowed us to meet with dozens of potential clients, similar opportunities happen often at Hollander, and nowhere else in the industry. We look forward to a long and prosperous partnership."
