

Hollander PowerStation™

Hollander's PowerStation is a powerful, pre-configured mini-server for running Powerlink®, the industry's leading yard management system. For a low monthly fee, PowerStation is delivered to you with the operating system, database, and Powerlink¹ applications installed and configured, significantly simplifying the process of getting up and running on the system.

- Low monthly fee spreads the cost of the server over 36 months.
- Easy to set up and maintain.
- Utilizes latest hardware technology for high performance (e.g. processor, solid state drive).
- Utilizes remote desktop connectivity to extend Powerlink applications to workstations.
- Works with all computers, including Apple Mac's.
- Overnight warranty replacement².
- Backup via Hollander's Powerlink Backup service or on a flash drive.
