

Snap-Itsm

Simplify capturing, organizing and linking pictures with inventory in Powerlink®

More and more, images are critical to selling recycled parts. However, a lot of recyclers have yet to start using images on an ongoing basis because it can be a time consuming, burdensome process. Hollander's Snap-It simplifies the process, reducing the time, hassles, and errors associated with associating images with inventory. Snap-It is a no-cost Android-based app which enables Powerlink users to take pictures of their vehicles and parts, link them with the corresponding inventory record, and upload them into Powerlink in a faster way than ever before. There is no fee or installation charge.

Three Easy Steps to Images

In three simple steps users can attach images to their corresponding parts:

1. Enter or scan the inventory number
2. Take pictures of vehicle or part
3. Upload images to Powerlink

Efficient and Effective

- Simple, intuitive workflow for all users.
- Reduces the time and hassle associated with taking pictures.
- Automatically imports pictures into Powerlink Image directory.
- Doesn't require users to access Powerlink.
- Developed on the lowest cost and market leading mobile OS.
- Utilizes device features (e.g. bar-code scanner, camera).
- Organize/edit images using the devices photo gallery features.
- App is free and available for download on Google Play.
