

FOR IMMEDIATE RELEASE

Hollander Introduces CoreConnectSM Core Buying Program

New solution provides recyclers insight into the value and demand of their Core inventory

MINNEAPOLIS – June 10, 2015 - Hollander, LLC., a business unit of Solera Holdings, Inc. (NYSE: SLH) and the leading provider of software and data solutions for the automotive recycling industry, announced the release of CoreConnect today. Developed in partnership with Rebuilders Automotive Supply (RAS), CoreConnect identifies the price and demand of Core parts for an automotive recycler and simplifies the process of selling those parts.

CoreConnect enables recyclers to easily determine the value of Cores they have in inventory or on salvaged vehicles they are considering purchasing, by identifying the demand for those parts. RAS identifies the demand for Cores from manufacturers and rebuilders within a recycler's inventory in EDEN[®], Hollander's parts locating network. Additionally, yards using Hollander's Powerlink[®] yard management system can seamlessly integrate with CoreConnect automating the associated inventory management and sales process.

"A common ask from our customers is to help them identify more demand for their parts. CoreConnect provides them with that key knowledge for their business. In one instance, the solution identified over \$76,000 of immediate revenue for a recycler," said Chad Meyer, Senior Director of Product Management. "CoreConnect provides them with inventory valuation, key decision support information within the applications workflow, and streamlines the process of selling and shipping the parts to RAS."

The web based application optimizes the Cores valuation process by giving recyclers various ways to identify the parts' value. Users can search by vehicle by entering or scanning the vehicle's vehicle identification number (VIN), run a query against their entire inventory, and subscribe to alerts for limited time offers for high value parts. Once a Core is placed into the program the price is guaranteed for a period of time, while the recycler retains the ability to remove and sell the Core elsewhere. Integration with Powerlink ensures the parts are removed from inventory and delisted from EDEN, eBay, HollanderParts.com and Hollander Storefront. CoreConnect also manages the process of notifying RAS to pick up a Core bin when full and electronically invoices them.

"Our vision was to use technology to seamlessly connect the high demand for Cores from numerous sources with supply; CoreConnect is the reality of that vision", said Jack Bowser, CEO of Rebuilders Automotive Supply. "RAS along with Hollander is excited to bring this solution to market and help all Core market stakeholders."

###

About Rebuilders Automotive Supply

With over 40 years in the automotive recycling industry, RAS is a quality and service conscious company, with operations in Coventry, Rhode Island and Tampa, Florida. In an age where sustainability counts, Rebuilders Automotive Supply proudly boasts being 'Green' since 1972. RAS is a front runner in the industry with its patented core sourcing technology, online valuation and inventory tools designed specifically for recyclers - CorePro, RASBid, CorePro Mobile, CATPro and Metal Recycling. These RAS tools streamline all aspects of the automotive core evaluation and inventory process while maximizing core revenue. With over 40 product lines, 180,000 part numbers in inventory and over 3 million cores processed annually, RAS is the number one full-line core supplier to the largest remanufacturers and auto recyclers in the world.
